

PowerSpin™ BX Centrifuge

Model: C884E

- POWERSPIN™ BX CENTRIFUGE
- VARIABLE SPEED 1000-11000 RPM
- 8 PLACE FIXED ANGLE AND 24PLACE MICROHEMATOCRIT ROTOR
- 99 MIN DIGITAL TIMER
- POWER INPUT 220V

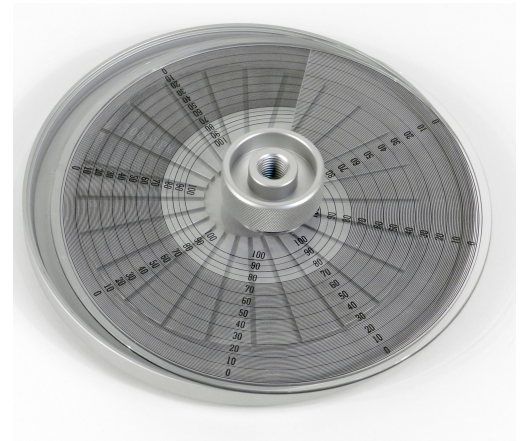

UNICO is proud to introduce the latest addition to the PowerSpin™ Family – the BX model high speed centrifuge with 3 rotor options:

8-place Blood Tube rotor, 24 place Microhematocrit and 24 place Micro-Tube rotor

The state of the art design incorporates advanced safety features like Zero RPM Lid Lock and Auto Unbalance Detection, Rotor Recognition and Shutdown.

The built in oversized LCD Display provides real time data to the user. With the push of a button you can speed up or slow down the rotor within 1,000 - 11,000 RPM range (Max 5000 RPM with the Blood Tube Rotor). Maintenance free brushless DC motor is powerful and super quiet. The cover of the Microhematocrit rotor incorporates a reader, allowing for instant reading and eliminating the need for additional specimen handling.
