The G504 Binocular Microscope is a high-performance instrument designed for demanding applications requiring superior image quality and comfortable viewing. It features a Siedentopf binocular head for interpupillary and dioptic adjustment, ensuring personalized comfort during extended observation. Paired 10X wide-field eyepieces provide a wide field of view and comfortable viewing. The set of Plan objectives (4X, 10X, 40X, and 100X) delivers exceptionally flat, clear, and color-corrected images across the entire field of view, crucial for accurate analysis and documentation. A precise mechanical stage allows for smooth and accurate specimen positioning, while the Kohler LED illumination system with intensity adjustment ensures optimal contrast and brightness for any sample. The microscope also features a universal power input (90V-240V), making it suitable for use in various locations. This microscope is ideal for demanding educational, laboratory, research, and clinical applications.
