The IP733 Trinocular Microscope is a versatile and robust instrument suitable for a wide range of applications in education, laboratories, and routine microscopy, now with the added benefit of trinocular functionality for imaging and documentation. It features a comfortable trinocular viewing head with WF10X wide-field eyepieces, allowing for both comfortable direct observation and simultaneous connection to a microscope camera for capturing images and videos. The microscope is equipped with a set of DIN standard achromatic objectives (4X, 10X, 40X, and 100X oil immersion), providing versatile magnification for various specimens. The 100X objective is designed for use with immersion oil to achieve the highest resolution. Illumination is provided by a powerful 6V 20W halogen lamp with intensity control, allowing users to adjust the brightness for optimal contrast and visibility. This microscope is a reliable and cost-effective solution for routine microscopy tasks and image capture.
