The UNICO M250 Series microscopes are designed for college-level instruction and discovery. Recent updates include a reverse nosepiece, larger base, and sturdier body construction, providing even greater value.

Choose from monocular, dual-view, or Seidentopf binocular heads, available in corded or cordless configurations. All heads rotate 360°. Binocular heads feature diopter control on one eyetube and adjustable interpupillary distance (55-75mm). Standard features include color-coded DIN achromatic 4x, 10x, 40x, and 100x objectives and 10x widefield eyepieces.

The objectives are mounted on a 4-position, positive click-stop reverse nosepiece. All optical surfaces are precisely polished, sealed, and coated with anti-fungal, color-correcting, and hardening agents to enhance true color viewing and extend lens life.
